Discounts only applied to AGCO Parts.

Genuine AGCO Filters

Clean air is everything.

5%
instant
savings

Just because it “spins on” or “drops in” doesn’t mean it’s the same.

AGCO engineers work diligently to specify filter requirements for every single machine component. This includes filter media, seals and other features that must meet our **EXACT** specifications.

Little things can cause big damage.

Protect your investment with proven performance.

Water, dirt, or rust can easily make their way into your fuel. Using genuine AGCO fuel filters will capture these particles before they damage engine components. Regularly changing the fuel filter helps prevent clogged filters and decreased engine power.

Genuine Parts. Genuine Service. Genuine Reliability.

What level of accuracy is right for you?

From entry level, up to the most accurate steering system on the market, Ag Leader offers a solution for every operation.
